AN ingenious trap permanently captured a young thief at Frankfort. It appears that Finzel, the butcher, had been missing money from his cash drawer for some time and set a trap, a loaded Winchester rifle, with a string attached to the trigger and doornob. He was only 18 years of age, and had been a sport for several years.

He was 52 years old and leaves no family, his wife having died about a year ago.

Twenty-four from Maysville, four from Augusta, three from Tuckahoe and three from Vanceburg went up to Flemingsburg yesterday afternoon as delegates to the Y. P. S. C. E. Convention. July Weather.

Records of the Weather Bureau for the past twenty years show the normal temperature for the months of July to have been 78°. The warmest July was in 1878, with an average of 89°, and the coldest 1882, average 75°. The highest temperature during any July was 104°, July 10th, 1881, and the lowest, 53°, July 1st, 1885. The average July rainfall has been 3.08 inches. The greatest monthly precipitation was 9.63 inches in 1875, and the least 1.31 in 1887. The average number of clear days was 11 and cloudy 7. The prevailing wind has been Southwest. From this some idea may be gained of what to expect the coming month.

A Romance of the War.

Philadelphia Ledger.—There are two William J. Stones in the present Congress, and both are natives of Kentucky. Though one represents a Missouri district. Of the Kentucky Congressman this story is told: He was wounded at the battle of Cynthiana. He lay in pain in the sun for some time afterwards. While there a young lady who was devoting her energies to the care of the wounded found him. She had nothing to shelter him from the burning sun, and there was no ambulance at hand. Hastily driving some short sticks into the ground about the soldier's head, she spread her handkerchief upon them and thus afforded him a bit of shade, while she attended as best she could to his wound. When he was taken to the hospital his leg was amputated. She nursed the man back to health in time, and the acquaintance thus formed developed into a case of true love. After the soldier was honorably discharged she became Mrs. Stone, the wife of the Congressman.

A Wonder in Figures.

Some person of a mathematical turn of mind has discovered that the multiplication of 987654321 (which you will observe are simply the figures 1 to 9 inclusive reversed) by 45 gives 44,444,444.5. Reversing the order of the digits and multiplying 123456789 by 45 we get a result equally as curious, viz., 5,555,555.505. If we take 123456789 as the multiplicand and interchanging the figures in 45 so as to make them read 54, use the last numbers as the multiplier, and the result will be 6,666,666.606. Returning to the multiplicand 987654321 and taking 54 as the multiplier again, the result will be 53,333,333.334—all 3s except the first and last figures, which together read 54—the multiplier. Taking the same multiplicand and 27, the half of 54, as the multiplier, the product is 26,666,666.667, all 6s except the first and last figures which together read as 27—the multiplier. Now interchanging the order of the figures 27 and using 72 instead as a multiplier 987654321 as the multiplicand we get as a product 71,111,111.12, all 1s except the first and last figures, which together read as 72, the multiplier.

Mathematicians and others who delight to wade around in the realms of the curious are well aware of the fact that there are many wonders to be met with on every hand, but it is doubtful if there is a better illustration of the trite saying, "Figures will work wonders," than that given above.
